

Incredible Allotments!

The Tanyfron allotment

Do you know what an allotment is? Allotments are small plots of land to grow your own fruit and vegetables!

Trusted Transport!

You can get to the allotments in many different vehicles. There is a carpark by the allotment as a result you have easy access to them. The tanyfron allotments, which have lots of transport links, are easy to access.

In the allotment carpark!

Strong Security!

The allotments, which have a tall metal fence and gate, are secure. You need a key to open the allotments as a result the allotments are secure. There is no evidence of vandalism apart from a few damaged greenhouses.

The lock on the gate!

Super Soil!

The big pile of compost

The allotment holders add compost to their soil, as a result the soil is richer. The allotment, which has alkaline and loam soils, grow different things. You can tell there is good soil and drainage because the plants are growing well, the floor isn't wet and there were no puddles.

Perfects Plants And Wacky Wildlife

At the allotments there is evidence of wildlife: there are holes in plant leaves for caterpillars and snails. There are wildflowers and animals: not just fruit and vegetables. There were a lot of different fruits and vegetables like - cabbage, sprouts, chillis, sunflowers, corn, apples, tomatoes, beans, onions, strawberries, weeds and runner beans. The wildlife helps with pollution, and worms are good for soil, but it can also hinder growing because they consume the plants.

Luxury Landscape!

The landscape

Tanyfron, which is a village in Wrexham, has an allotment in it. There are houses, roads, trees, fences, a gate, paths, a carpark, grass and bushes surrounding the allotment. The allotments, which are bumpy, hilly and flat, are used to grow fruit and vegetables.
